

Ultra SSX Sheetmetal Intake Manifold

Our Ultra SSX sheetmetal intake manifold is the ultimate intake manifold for ultra-high performance 3.8s, 4.2s, our Long Rod 4.3, or Class 7 Championship V6 engines.

Fabricated from aluminum alloy billet and sheetmetal for ultra-high performance applications where maximum unrestricted air flow and tuned length tapered runners are desired for all-out performance applications. Includes provisions for thermostat and coolant temperature sensor and fits all square-flange carburetors, throttle body elbows and the popular self-tuning EFI systems.

Ideal for naturally aspirated and forced induction applications.
